

**Opening Worlds
Within Our World**

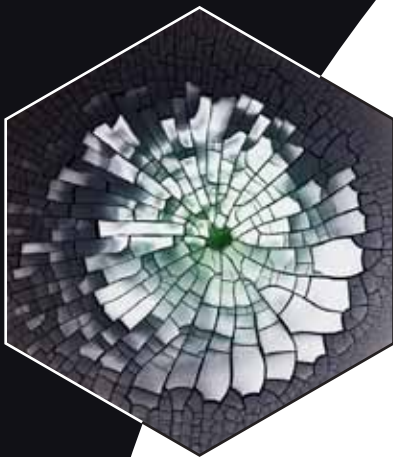

Abundant Possibilities in a Shrinking World

Discoveries and innovations are increasingly being made at smaller and smaller scales. Without the right tools and solutions, researchers, developers and manufacturers working at the nanoscale face daunting challenges.

After all, how can the unseen be explored, harnessed and built?

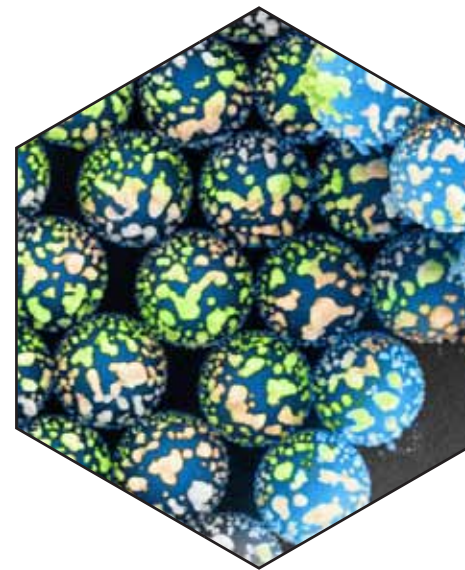

The world discovers more, creates faster and lives better with FEI's tools for nanotech

Safer, better products

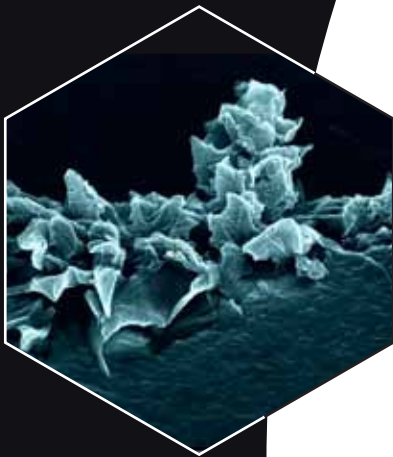

FEI's enabling Tools for Nanotech™ are helping to make once unimagined possibilities a reality by delivering breakthrough results to diverse users.

FEI has more than 60 years of technological leadership and field expertise in a wide variety of applications, including the advanced study and development of new materials, nano-scale process control and the development of new nano-enabled products.

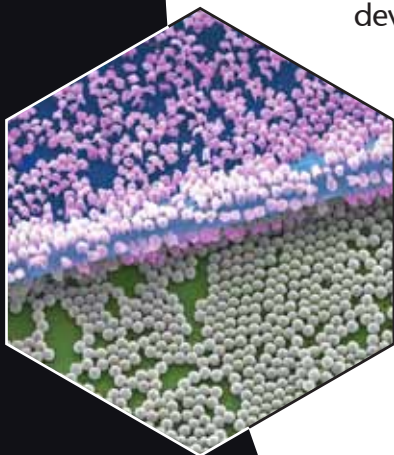

Accelerated discovery

Our best-in-class solutions for imaging, characterization, analysis and modification have allowed us to become a trusted partner to world-class customers.

We have more than 8,000 systems installed at over 3,500 customer sites worldwide.

Enhanced connectivity

Better health

As the recognized leader in innovative tools for researchers and developers working down to the atomic level, FEI is committed to helping our customers succeed in solving some of the greatest challenges of our time.
